

Manual IEDD Tool Kit

Designed to be fit for purpose in collaboration with the European Defence Agency (EDA) by experienced hands-on operators. The toolkit provides a comprehensive range of essential tools and equipment for manual IEDD enabling operations to commence immediately and effectively.

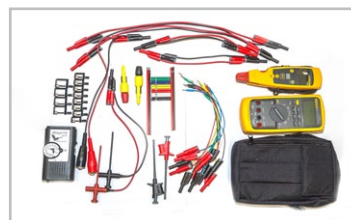

Delivered in a strong transport case for safe long distance shipment, the toolkit contains a practical backpack consisting of 1st line tools enhanced with other diagnostic and detection equipment and a range of 2nd line tools and equipment.

The backpack consists of a number of internal pouches and elastic loop separators enabling tools to be easily located and stored in operational phases. The enhanced equipment includes a multimeter, current clamp, Wire Remote Insulation Piercing Tool (WRIPT), Wire Attack Kit (WATK), Wire Bypass Clamp Kit (WBCK) and hand held metal detector.

Included within the 2nd line tools and equipment are a battery operated drill, 'Exact' saw, videoscope, thermal imager, gas torch, ultrasonic detector, and glue gun.
